PROFESSIONAL SUMMARY

Information technologist with five years in information technology infrastructure, systems administration and technical support, and a growing focus on fintech and instant-payment endpoints. Co-founder of Checkpoint by Buffr, responsible for technical operations and site rollout, and lead of the Hotel Etuna brand repositioning. Keeps secure, reliable environments running and resolves complex field issues across point-of-sale systems, networks and Microsoft 365.

EXPERIENCE

Co-founder, Technical Operations, Checkpoint by Buffr

2026 to present

Buffr Financial Services CC · Windhoek, Namibia

- Leads on-site rollout: reception tablets, network set-up and near-field communication badge readers.
- Trains front-desk staff and provides field support once a property is live.
- Leads the installation at Hotel Etuna, Ongwediva, the first pilot site.

Project Lead, Hotel Etuna Brand Repositioning

March 2026 to present

Family business, formerly Etuna Guesthouse and Tours · Ongwediva, Namibia

- Leads the rebrand from Etuna Guesthouse and Tours to Hotel Etuna: brand identity, graphic assets and marketing consistency across digital channels.
- Manages the hotel's social presence and its partnership with Topcheri Management for rebrand promotion.

System Engineer, Field Services, Business Connections Namibia

June 2025 to present

Windhoek, Namibia

- Installs, configures and supports point-of-sale systems across retail locations.
- Troubleshoots hardware, software and network issues on site and remotely.
- Maintains and upgrades point-of-sale terminals, printers, scanners and payment devices.
- Supports store information technology infrastructure: routers, switches and wireless.
- Responds to incidents to minimise downtime; documents issues, resolutions and configurations.
- Trains store staff on point-of-sale use and basic troubleshooting; works with vendors on rollouts and technology refreshes.
- Upholds company information technology standards, security policies and procedures, and data management.

System Engineer (Contractor), Business Connections Namibia

February 2025 to June 2025

Windhoek, Namibia

- Delivered the countrywide rollout of new GK point-of-sale software for Shoprite Namibia.
- Installed printers, scanners and point-of-sale peripherals; upgraded processor memory and storage.
- Trained users on the new point-of-sale software.

Information Technology Consultant, Green Baseload Africa

June 2024 to June 2025

Concurrent with TeSik Group of Companies · Windhoek, Namibia

- Managed Microsoft 365 licences, user accounts and the Microsoft 365 Admin Center.
- Created and managed SharePoint sites; configured company email, domains and security settings.
- Provided information technology support; managed user access, permissions and data protection.
- Maintained networks, systems and cloud services; recommended and implemented information technology solutions.
- Ran system updates, backups and migrations; trained staff on Microsoft 365 and related tools.

Information Technology System Administrator Assistant, AIJ Project Cost Consulting (Ongos Valley)

February 2023 to June 2024

Concurrent with TeSik Decking · Windhoek, Namibia

- Managed information technology inventory and asset tracking; installed and maintained systems and networks.
- Provided end-user support for hardware and software; administered Office 365, domain and email hosting.
- Set up Hikvision fingerprint access for staff; maintained the network, including access points.
- Managed databases; installed AutoCAD and managed its licences.
- Recommended hardware and software procurement; trained new team members on information technology procedures.
- Recommended artificial intelligence tools where they improved operational efficiency.

Information Technology Intern, S&S Consulting Services CC

November 2022 to May 2023

Windhoek, Namibia

- Ran on-site backups of company data; upgraded network security for clients with no prior security infrastructure.
- Set up site equipment: laptops, desktops, switches and printers.
- Handled internet connection applications; installed and managed Sophos firewalls.

EDUCATION

Bohai University

March 2017 to December 2020

Bachelor of Software Engineering · Liaoning, China

- Member, Bohai International Student Association.

Etosha Secondary School

January 2011 to October 2015

Namibia Senior Secondary Certificate · Tsumeb, Namibia

- Hostel Prefect.
